HOW TO USE (LIPOSOLUBLE WAX)

GET TO KNOW OUR RANGE:

Professional step-by-step (Salon Service)

01

Sanitize / Wash your hands with soap and water and pat dry.

08

Follow the same procedure for the rest of the body parts to remove unwanted hair.

02

Consult your client for any special needs before you start the service.

09

After waxing, apply Biosoft post wax oil and lightly massage over the waxed area to get rid of wax residues and replenish the skin's moisture barrier.

03

Heat biosoft liposolable cream wax in the Biosoft Solo or Double or Multi- function wax heater. Set the heater to maximum temperature until the wax melts. Check the consistency of wax before applying on the client's body. Maintain the heater temperature at 80 to 100°C.

10

Apply soothing lotion to soothe the skin.

04

Cleanse the area to be waxed with a stringent and pat dry with a disposable wipe/ towel.

05

Use biosoft pre wax gel to cleanse the area to be waxed for better adherence and smoother hair removal.

06

Apply thin layer of wax with Biosoft disposable wooden spatula in the direction of hair growth. (Avoid reapplication on the same area.)

07

Place a Biosoft Non-woven wax strip over this area and press down firmly over the wax. Hold the skin tightly and pull the strip quickly in the opposite direction to the hair growth.

HOW TO USE (STRIPLESS WAX)

GET TO KNOW OUR RANGE:

Professional step-by-step (Salon Service)

01

Sanitize / Wash your hands with soap and water and pat dry.

02

Consult your client for any special needs before you start the service.

03

Pour the Peelable wax beads in a tin. Place the tin in the biosoft wax heater. Set the heater to maximum temperature until the wax melts. Check the consistency of wax before applying on the client's body. Maintain the heater temperature at 60 to 80°C.

04

Cleanse the area to be waxed with a stringent and pat dry with a disposable wipe/ towel.

05

Use biosoft pre wax gel to cleanse the area to be waxed for better adherence and smoother hair removal.

06

Apply a medium thick layer of peelable wax with Biosoft disposable wooden spatula in the same direction of the hair growth using smaller section. Apply the wax in "C" shape for thicker edges. The thick end of the wax will make sure it does not break off in multiple pieces when being removed. Always use a clean Spatula, NO DOUBLE DIPPING!

07

Pat the applied wax lightly. Let the wax dry then apply gentle pressure to loosen an edge of the wax. Hold skin taut and pull the dried wax against the direction of hair growth.

08

Follow the same procedure for the rest of the body parts to remove unwanted hair.

09

After waxing, apply Biosoft post wax oil and lightly massage over the waxed area to get rid of wax residues and replenish the skin's moisture barrier.

10

Apply soothing lotion to soothe the skin.

500g

HOW TO USE (PARAFFIN WAX)

GET TO KNOW OUR RANGE:

Professional step-by-step (Salon Service)

01

Sanitize / Wash your hands with soap and water and pat dry.

07

Repeat this process until you have at least 3 to 4 layers of wax on the client's hands or feet.

02

Consult your client for any special needs before you start the service.

08

Then quickly place a plastic cling sheet wrap over it.

03

Place Biosoft Paraffin wax in a paraffin wax heater and melt completely. The temperature should be at 50 degrees minimum. Test product temperature before using, making sure that the temperature is not too high. (Do a patch/ temperature test on the back of your hand). **WARNING:** Wax may burn if subjected to excessive heat. Never heat this product over direct flame.

09

Apply another 1-2 layer of paraffin wax over the cling sheet.

04

Cleanse the area to be treated (hands and feet) properly with a cleansing lotion or hot towel/ disposable towel.

10

Now wrap it with foil paper or wrap it in a towel for 10 to 15 minutes. Allow the product to cool and solidify.

11

Use soft disposable tissue to remove the wax residue from your skin.

05

Using a paraffin brush, apply a layer of Biosoft Paraffin Wax on the hand or feet. Leave it on for a few seconds until a layer forms over the area.

12

Apply soothing lotion to soothe the skin.

06

Wait for the wax to dry. You will know it is dry when the shine has faded. Once dry, apply again using a brush. This stops the warm wax from coming in direct contact with the skin, preventing burns.

PARAFFIN WAX

16

PEACH

Packed with peach, almond, and olive oils, this hydrating formula boosts skin elasticity, ideal for rough areas, leaving a protective film for smooth, moisturized skin.

Experience skin-friendly,
long-lasting hair removal.
